*items in grey indicate possible tab and/or portlet (TBD)

Questions/Concerns:

1. A DRD and Functional Spec should be written for each portlet. The DRD will help determine what UI resources are needed.
2. Communities portlet would only be required if additional Communities are created prior to Jan release.
3. Should we remove the MyAccount link and make it a portlet, so a user can see and edit their info without leaving MyPearson?
