Browsers by Version - Help Card

Column Definitions

Browser - A program used to locate and view web pages. These include Netscape, Microsoft Internet Explorer, Opera and others.

Version - The specific version of the browser.

Hits - Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

Visits - Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
