JavaScript Support - Help Card

Column Definitions

JavaScript Support - The visitor can choose to enable or disable JavaScript in their browser.

Note that if a visitor changes the browser JavaScript support state during a session, the visit is counted in both categories.

Values for "Unknown variable" represent hits where the parameter was not present in the Web data activity file. Visit totals are not provided because client detail attributes such as JavaScript support can change within a single session, if for example, a visitor has multiple browsers open to the same web site at once.

Page Views - A hit to any file classified as a page. In order to view a web page with embedded images, for example, a browser must retrieve multiple files. The page and its embedded files counts as a single page view.

Visits - A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

Note that if the dimension changes state during the course of a visit (such as a visitor changing from non-customer to customer), the visit will be recorded for both states. In such cases, the total of visits in this report may be greater than the number of visits reported in the Overview. In the Key Metrics Summary report for example, if a visit spans several hours, it is recorded in each of the hours.

Report Descriptions

The visitor can choose to enable or disable JavaScript in their browser.

Note that if a visitor changes the browser JavaScript support state during a session, the visit is counted in both categories.

Values for "Unknown variable" represent hits where the parameter was not present in the Web data activity file. Visit totals are not provided because client detail attributes such as JavaScript support can change within a single session, if for example, a visitor has multiple browsers open to the same web site at once.
